## CONTACT US FOR THESE SERVICES

### Legacy Product Sustenance Engineering

Our team supports research and development for legacy product maintenance, including minor enhancements and release management.

### New Product Engineering - from Design to Commercialization

Our experts perform design, development, testing and product commercialization and sustenance. We provide technology consulting across the product lifecycle.

### Value Engineering

Our experts use industry best processes and practices, complemented by their knowledge of the latest technology solutions, to improve the "value" of products or services by examining their function. We optimize the cost of sustaining products through value engineering reviews and recommendations. In certain scenarios, we can extend the life of a product to maximize revenue.

We are A Minority-Owned Small Disadvantaged Business  
MBE certified (Minority Business Enterprise)
